

InfraCo Asia Investments Call for Proposals – Infrastructure investment opportunities in Emerging Asia

Singapore, 2nd December 2016

Are you a project sponsor facing difficulty raising sufficient funds to reach financial close? Do you know of a development that has stalled due to inadequate financing? InfraCo Asia Investments Pte. Ltd. (IAI) is inviting proposals for eligible investment opportunities in South and South-East Asia.

The Private Infrastructure Development Group (PIDG) is a coalition of donors mobilizing private sector investment to assist developing countries in attaining infrastructure vital to boosting economic growth and combating poverty. PIDG is establishing an Equity and Mezzanine Finance Facility with the following objectives:

- (a) To address the gap in the supply of (principally) equity and mezzanine capital required by infrastructure projects to reach financial close, and through such co-investment, facilitate the construction and completion of commercially viable infrastructure projects; and
- (b) To facilitate the construction and completion of projects with high development impact and which are unable to raise sufficient debt or equity financing and/or expected returns are too low to attract sufficient private sector equity investment until a later stage when the project is in operation and cashflows are proven.

In South and South East Asia, the Facility will operate through InfraCo Asia Investments Pte. Ltd. (IAI), a company incorporated in Singapore, and part of the PIDG www.pidg.org.

Proposals must identify potential investment opportunities that meet IAI's objectives and investment criteria. Following evaluation, proposals deemed suitable will then undergo thorough due diligence and investment consideration by IAI.

For details of the submission process and for the full investment criteria, including eligible countries and project sectors, please visit <http://www.infracoasia.com/opportunities-proposals.asp>. Proposals should be submitted to IAI by **16 January 2017**.
