

## **InfraCo Asia: Manager, Projects and Operations**

Due to continued growth and portfolio success, InfraCo Asia has an exciting opportunity for a Manager, Projects and Operations to join a driven, passionate and entrepreneurial team based out of their office in Singapore.

This is a fantastic opportunity for an experienced technical development professional to play a significant role in ensuring bankable projects are facilitated across frontier markets in South and South East Asia.

### **About InfraCo Asia**

InfraCo Asia Development Pte Ltd (InfraCo Asia) is a commercially managed infrastructure development and investment company of the Private Infrastructure Development Group (PIDG). Headquartered in Singapore, InfraCo Asia aims to stimulate greater private sector investment in infrastructure projects in South and South East Asia. InfraCo Asia funds early stage, high-risk infrastructure development activities by taking an equity stake in projects and focusing on socially responsible and commercially viable, sustainable infrastructure projects that contribute to economic growth, social development and poverty reduction. InfraCo Asia is currently funded by three members of PIDG – the UK Department for International Development (UKAid), the Australian Department of Foreign Affairs and Trade (DFAT), and the Swiss State Secretariat for Economic Affairs (SECO).

### **Position Summary**

- Reporting to the Director, Projects and Operations, with responsibility for oversight and direction of project development teams undertaking assessment, design, contracting and construction of infrastructure facilities in the region in which InfraCo Asia is mandated (currently 6 countries in South Asia and 6 countries in South East Asia).
- Ensuring all related project risk management, procurement, design, specification, contracting, value engineering, scheduling, construction, installation, testing, commissioning, and operation and maintenance activities are executed on time and in accordance with international standards for quality, environmental protection, social impacts, and health and safety.
- Management and supervision of the application of, and compliance with, the IFC Performance Standards on Environmental and Social Sustainability, including with respect to occupational health and safety.
- Travel to and inspection of project sites during project identification, feasibility study, construction, and operation phases.

### **Requirement & Attributes**

- Degree in Engineering
- At least 10 years of working experience in Asia in project assessment, design, construction management, and/or O&M management on multi-disciplinary

infrastructure projects (preferably in renewable energy, water supply, waste management, and/or agriculture)

- Track record in project management, with demonstrated capability to prioritize, and manage multiple diverse tasks and projects, and ability to manage and coordinate activities among different groups and locations
- People person with the strong ability to manage and interact with stakeholders ranging from engineering and construction firms to private sector investors and public sector funders
- Good attention to detail and methodical approach to project delivery
- Commercially astute
- Strong written and oral communications skills, including ability to clearly and succinctly present and explain complex situations and recommended actions
- Comfortable with frequent travel and working in different cultural environments

This is a great opportunity to join a very active infrastructure investment and development organization with a solid track-record of closing projects and positively affecting communities in developing Asian countries.
